

SUREN HAKOBYAN

Frontend Software Engineer

• +374-95-22-27-06 • surhak96@gmail.com • linkedin.com/in/surhak • github.com/surohak • Yerevan, Armenia

ABOUT ME

I build high-performance, AI-powered web applications that millions of people use daily. Over 8+ years, I've specialized in complex visual editors (Canvas, Konva.js, Fabric.js), AI-integrated interfaces, and scalable SaaS architectures — shipping products for Picsart (400M+ users), Warner Music Group, Empire, JobLeads, and Simplified. Deep expertise in HTML5 Canvas and real-time image/video processing. Full ownership mindset: from architecture planning and CI/CD setup to mentoring teams, code reviews, and stakeholder communication. Passionate about AI-augmented development — actively leveraging Cursor, ChatGPT, Figma AI and building expertise in Prompt Engineering and agentic AI workflows.

Experience

JobLeads <https://www.jobleads.com>

Frontend Software Engineer

Hamburg, Germany | Remote

07/2024 - Present

Started in the **Resume World** team shipping **AI-powered** features (**AI Resume Builder & Resume Review**), then moved to the **User Acquisition** team — owning frontend for **SEO**, conversion optimization, and growth tools that directly drive platform revenue.

- Contributed to the development of AI Resume Builder and AI Resume Review features with NLP-driven scoring and auto-suggestions — now a core product differentiator
- Build and optimize high-converting landing pages and SEO-driven content pages, directly impacting acquisition metrics and organic traffic
- Implement A/B testing frameworks and conversion experiments, translating results into measurable sign-up and activation improvements
- Develop internal growth tools to scale campaigns and automate acquisition workflows
- Designed reusable component library using Vue 3 Composition API, cutting feature dev time by ~30%
- Contributed to building a reusable component library using Vue 3 Composition API, cutting feature dev time by ~30%

Simplified <https://app.simplified.com>

Frontend Software Engineer

San Francisco, United States | Remote

11/2021 - 07/2024

Primary owner of the **AI Photo/Video Editor** module — the most technically complex part of the platform, built on **Canvas** with **Fabric.js**. Part of a 10+ engineer frontend team.

- Owned the development and maintenance of the AI Photo/Video Editor module, ensuring adherence to project timelines and quality standards
- Successfully collaborated with the team to implement complex and critical components of the application — real-time image/video processing, layering systems, filters, transformations, and AI-powered enhancements
- Worked directly with the CTO to prioritize tasks and allocate resources effectively, ensuring alignment with project goals and objectives
- Conducted daily code reviews across 10+ engineers to maintain code quality, identify potential issues, and ensure consistency and best practices across the codebase
- Mentored 3+ junior team members, providing guidance on Canvas internals, complex technical concepts, and frontend best practices, accelerating their path to independent delivery
- Managed and coordinated complex project tasks, including planning, execution, and delivery of key features within the AI Photo/Video editor
- Collaborated with cross-functional teams to gather requirements, design solutions, and implement features that meet user needs and business objectives
- Built and maintained real-time WebSocket communication layer for live collaborative interactions within the editor
- Continuously researched and evaluated new technologies and frameworks to enhance the editor's capabilities and performance

ENKE Systems

Frontend Software Engineer

New York, United States | Remote

03/2021 - 12/2025

Out-staffed to **Warner Music Group** and **Empire** — two of the world's largest music companies. Worked on 3 production applications (CRM, CMS, Release Management) in a 4+ frontend engineer team. Directly communicated with ENKE clients to get correct Business requirements and translate them into technical requirements.

- Built 3 enterprise web applications (CRM, CMS, Release Management) from initial setup to production for Warner Music Group and Empire
- Direct client-facing engineer — gathered business requirements from clients stakeholders, translated them into technical specs
- Contributed to architecture planning, tech stack decisions, component structure, state management patterns, and CI/CD pipeline setup
- Conducted code reviews ensuring quality, best practices, and consistency across the multi-project codebase
- Developed responsive UI components, SCSS modules, and reusable patterns using React, Redux, TypeScript, and Material UI shared across all applications
- Led regular stakeholder meetings — progress reports, milestone tracking, delivered all projects on time and within budget
- Implemented unit and E2E test automation ensuring reliability and stability across all client projects
- Maintained production applications post-launch — troubleshooting, bug fixes, enhancements within 4-6 hr/month support window

Founding frontend engineer on Picsart's **Creative Photo Editor** — built from scratch using **Canvas (Konva.js)** as part of a 28+ engineer team.

Product now used by 400M+ people worldwide.

- Founding team member — built Picsart's online Creative Photo Editor from the very first line of code using Canvas element with Konva.js, React, Redux, TypeScript, and ReactJS
- Developed core editor features including brushes, filters, layers, text tools, image transformations, and real-time rendering within a 9+ engineer frontend team
- Independently built and deployed 5 WeChat mini-applications, expanding Picsart's presence to the WeChat ecosystem (1B+ potential users in the Chinese market)
- Contributed to code reviews, sprint planning, and architecture decisions, helping shape engineering standards during the product's critical early growth phase
- Collaborated cross-functionally with QA, Designers, and Backend developers to coordinate project tasks, address feedback, and ensure successful delivery across rapid release cycles
- Helped drive the team's Kanban → Scrum transition, improving sprint predictability and delivery cadence
- Developed reusable frontend components and features for the Photo Editor, contributing to a product now used by 400M+ people worldwide

Freelance / Contract / Volunteer Projects

Remote

Frontend Software Engineer

2018 - 2024

Worked on 8+ projects across fintech, blockchain, real estate, multiplatform, and gaming — as sole developer or within small teams, full frontend ownership.

- **Libertex** - Built frontend for a fintech trading platform serving stocks, CFDs, Forex, and cryptocurrency markets, working across a legacy codebase modernization effort | Vue, Backbone.js, TypeScript, Drupal
- **Sberbank** - Frontend engineer on an Online School platform for Russia's largest bank, building complex data visualizations and modular UI components within a large cross-functional team | React, Effector.js, GraphQL, Apollo Client, Chart.js, Storybooks, SCSS
- **Factoring, HelloPay** - Built CRM and CMS applications for fintech clients, implementing data-heavy dashboards, reporting interfaces, and complex form workflows | React, Redux, Tailwind CSS, Material UI, Recharts, React-Hook-Form
- **Stihi, CW** - Developed a cryptocurrency exchange platform with real-time trading interfaces, live price feeds, and blockchain integration | React, MobX, Axios, Quill, EOSJS, SCSS, Styled Components
- **Edi-Real** - Built a full multiplatform application (desktop, web, mobile) for real estate property management, handling Big Data visualization across all three platforms | React, Electron, React Native, Redux, Big Data
- **Boo** - Developed cross-platform applications integrating C++ libraries with web technologies through WebAssembly, including interactive map features and geolocation | C++, QT QML, WebAssembly, Maps, Leaflet.js, React, Electron
- **Arbrug** - Contributed to a 3D printer application forked from Ultimaker Cura, bridging Python backend with frontend interfaces | Python, QT QML, React
- **Dats** - Built frontend for gambling platform projects with server-side rendering and optimized performance | React, Redux, Next.js, TypeScript, Axios, Lodash.js, SCSS, Core UI

Skills

- **Main** - JavaScript, TypeScript, React, Vue, Canvas (2D), Redux, Next.js, Nuxt.js, Qt QML
- **HTML5 Canvas** - Konva.js, Fabric.js, Image/Video Processing, Real-time Rendering, Layering Systems, Filters, Transformations
- **State Management** - Redux (Toolkit), MobX, Zustand, Recoil, Effector.js, Vuex, Pinia
- **UI Components** - Material UI, Chakra UI, AntDesign, Vuetify, Core UI
- **Styles** - CSS, SCSS, SASS, LESS, Styled Components, Tailwind CSS, React JSS, PostCSS
- **Build Tools** - Webpack, Vite, Rollup
- **Git** - Github, Bitbucket, Gitlab
- **Tests** - Unit, Integration, E2E, Cypress, React Testing Library, Vitest, Jest
- **Multiplatform** - Electron.js, React Native, QT QML, WeChat Mini Apps
- **AI & Agentic** - Cursor IDE, ChatGPT/Claude API, MCP Protocol, Prompt Engineering, AI-Augmented Development, Figma AI, AI Feature Integration (NLP, Auto-suggestions, Smart Filters)
- **SSR/SSG** - Next.js (SSR, SSG, CSR), Nuxt.js (SSR, SSG)
- **API & Data** - GraphQL, Apollo Client, REST APIs, WebSocket, Firebase, Axios, React Query
- **Data Visualization** - Chart.js, Apache Echarts, Apache Superset, Recharts, Leaflet.js, Maps
- **Other** - WebAssembly, Node.js, Express.js, Storybooks, Redux-Form, React-Hook-Form, Quill, Lodash.js, Blockchain, Big Data, Performance Optimization, Code Refactoring, Code Review, Linux, OOP, Algorithms, Data Structures
- **Methodologies** - Agile, Scrum, Kanban, CI/CD, Cross-functional Collaboration
- **Leadership** - Technical Mentoring, Daily Code Reviews, Team Management, Stakeholder Communication, Architecture Planning, Project Delivery

Education

Yerevan State University

Yerevan, Armenia

Bachelor of Informatics and Applied Mathematics

2013 - 2020
